

Expectations are changing

**Users are seeking for
more interactivity**

**They feel entitled to have what they want,
when they want it and where ever they
choose to have it.**

Our Purpose

Speckless Innovations Limited is an Information Technology Consulting Firm with an in-depth understanding of Web/Mobile technology and turnkey solutions. We are committed to providing you with top-end consulting services and solutions to meet your unique business challenges.

We know what works and what does not. We know all of the secrets, recipes and tricks that can make the difference between failure and success.

Our professional team of business and technology consultants brings a wide variety of knowledge and skills combined with functional and industry experience to serve the high-demanding consulting and strategy planning needs of our clients for software, web, database design and development solutions. We are flexible to meet the diversity of your special requirements thus offering the services of our pre-qualified, experienced Information Technology consultants on both short-term and long-term assignments, from technical consulting helping your IT department in evaluating your current implementation and recommending enhancements, to evaluation and needs assessment, selecting the appropriate technology and tools, project management solution, and development of the complete end-to-end web application or software product.

If you have some idea in mind or you are thinking of applying IT technology in a unique and interesting way and you are not sure whether the concept is feasible, our consultants can hold a feasibility study and assist you with technical advice, investigation and assessment resulting in a feasibility report to provide you with a clear vision of how this solution can be used to meet your business objectives or gain a distinct advantage over competitors. Together we can build strategic partnership and either work with your business units and IT department to implement this solution or provide you with a turnkey project from strategy and management to complete development process.

Our Commitment

Innovation is a key to surviving in today's business world and our services follow a format that is specifically focused on what the client can do to move themselves to a position of Market Leadership.

1. We put the client's interest ahead of our own: This means we deliver more value than expected.
2. Behave as professionals: Uphold absolute integrity. Show respect to local custom and culture, as long as we don't compromise our integrity.
3. Keep our client information confidential: We don't reveal sensitive information. We don't promote our own good work. We focus on making our clients successful.
4. Tell the truth as we see it: We stay independent and able to disagree, regardless of the popularity of our views or their effect on our fees. We have the courage to invent and champion unconventional solutions to problems. We do this to help build internal support, get to real issues, and reach practical recommendations.
5. Deliver the best of our firm to every client as cost effectively as we can: We expect our people to spend clients' and our firm's resources as if their own resources were at stake. We operate as one firm. We maintain consistently high standards for service and people so that we can always bring the best team of minds from around the world—with the broadest range of industry and functional experience—to bear on every engagement.

Our Services

The core expertise of our team is spread over a wide array of the most popular technology solutions that allow us to provide exceptional service delivery to our clientele.

Part of the expertise we bring to the table is helping business see themselves for what they are and their reason for being, which is serving customers who are their lifeblood.
